

**Designed to be highly compatible with surroundings, and contrived for convenience of use**

**Stylish design liked by the whole family**

Its form conveying a full sense of healing just like being wrapped in snugly and its stylish design, which is attractive regardless of the viewing angle, will be liked by every member of the family.

**Far infrared radiation (Back Pad)**

Ceramics blended cotton cloth wraps the back with pleasant warmth.

**Castor**

The chair can be repositioned effortlessly.

**Detachable Back Pad, Seat Pad and Pillow**

They can be removed easily for cleaning or maintenance.

**Power reclining**

Angles of the Back Rest and the Foot Rest are adjustable with the easily reached Remote Controller.

**Side table AS-TS2 (Optional)**

Keep drinks, newspaper, etc. at hand.

**CYBER-Relax  
SKS-1800**

CYBER-Relax (Massage Chair SKS-1800)

Dimensions (Approx.) (With the Foot Rest stored)

28.3 W × 48.0 D × 48.4 H (inches) [72 W × 122 D × 123 H (cm)]

(When reclined, with the Foot Rest at the highest position)

28.3 W × 76.8 D × 27.6 H (inches) [72 W × 195 D × 70 H (cm)]

Weight (Approx): 187LB (85 kgs)

Reclining angle (approx): 120 - 170°

Rated time: 30 min

Power consumption: 140 W(50/60 Hz)

Medical Equipment Approval

in Japan: 27BZ0878

Before using, please read the "User Manual" carefully in order to ensure proper use.

Following persons must consult physician before using the product: \* malignant tumors, \* pregnancy or menstruation, \* high fever, \* acute illness (with aches), \* fragility and osteoporosis, \* dysesthesia, \* heart disease (user of medical electronic device, which is embedded in the body, like a pace-maker or others), \* anemia, \* abnormality or deformity of or on the backbone, \* undergoing medical treatment or, particularly, a physical abnormality is felt, \* problems with blood circulation in the legs, \* skin disease, \* prescribed bedrest. \* Also those who wish to use the product on a section on the body that was treated previously or is injured or affected by illness now.

\* Design and specifications are subject to change without prior notice for improvement of the product.

\* Colors of printing and actual product may differ slightly.

**FUJIIRYŌKI**

**The fruits of our labors in pursuit of comfort**

The further evolution of the massage chair,  
with combined stimulation of air and  
mechanical movements

**CYBER-Relax  
SKS-1800**

# Invitation to a dream world that is good for your health

What should we do to provide the best comfort to users?

This question has always been placed as the starting point of our new development.

“Solution massage” is designed to knead and slacken the stiffness and fatigue using the knead balls and the air bags. By introducing several new functions, for the first time in the industry, we have succeeded to push forward our technologies and realize “Synthetic treatments”.

We are pleased to invite you to the reserved seat as if in a dream.

In addition to the section where you wish to massage, you can select another desirable course depending on your physical condition.

## AUTO COURSE (10 substantial courses)

3 courses

WHOLE BODY  
SHOULDER  
WAIST

3 Modes

**REJUVENATION**  
Severe stiffness and fatigue are slackened and removed effectively.

**REFRESH**  
Fatigue and stiffness experienced in everyday life are slackened and removed comfortably.

**COMFORT**  
Accumulated fatigue is slackened and removed with gentle stimulation.

In addition to the 9 courses above (approx. 15 minutes) the “7 MIN Course” can be selected.

Manual controls are also provided for finer adjustments.

First in the industry!

New function

## SHOULDER MASSAGER

We have succeeded to develop and offer a new function named “SHOULDER MASSAGER” for the first time in the industry, in addition to the conventional massaging with air bags and knead balls. Stimulation applied around the “SHOULDER”, which is the massaging point for the entire shoulder area, alleviates stiffness and fatigue accumulated over the neck and shoulders.

※As of July 2004

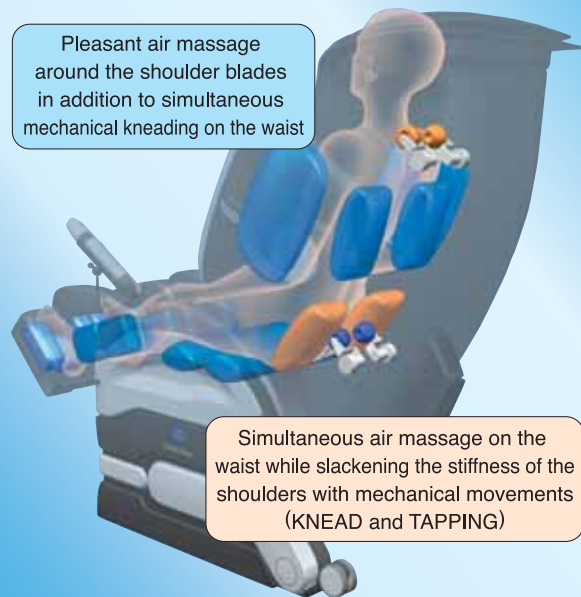

Original function

Air and Mechanical

## Solution Massage

Advanced pneumatic and mechanical technologies Composite stimulations over the face and on the points enable “Synthetic treatments”.

Pleasant air massage around the shoulder blades in addition to simultaneous mechanical kneading on the waist

Simultaneous air massage on the waist while slackening the stiffness of the shoulders with mechanical movements (KNEAD and TAPPING)

Point stimulation or air massage can be applied selectively if it is desirable on occasions.

## AIR MASSAGE

Soft stimulations with air bags over the surface with movements that push the muscles upward. With a sensation as if stiffness were removed from the entire body, the blood circulation is accelerated for better health.

Stimulation by air pressure on the legs on which fatigue is likely to accumulate! It accelerates the blood circulation and relieves fatigue.

**New function** Air massage on the soles

Added air bags for finer changes of stimulation with 5-level adjustment

**24 individual air bags and 5 level strength adjustment**

Simultaneous air massage for enhanced efficiency

**Original function** COMBO FOOT REST

Strengthened capacity of air pump now enables performing the air massage at two places simultaneously. By selecting simultaneously the waist and legs or the back and legs, for example, you can enjoy more effective massaging.

Stronger Air Power!

Employment of larger capacity air compressor

**Powerful and Smooth Massaging**

compressor

## MECHANICAL MASSAGE

At the shoulders, spine, or other sections where severe stiffness occurs, point stimulation with the knead balls provides effective massages. Diverse and stereoscopic kneading techniques slacken and remove stiffness.

Lines of the back bone, which differ from person to person, and depending on the physical condition at particular occasions are detected.

**Body Shape Sensor 3D Point Navi System**

**Original function**

Realization of diverse kneading techniques that closely resemble a professional's fingers

**3D Mode Massage**

**Original function**

Significant reduction in the operating sound of mechanical motors!

**Reduction of noise level by 20%, based on our comparison**

# Effective massaging of “kneading sections” on the UPPER BODY with air and mechanical stimulations. Why not indulge yourself in this ultimate comfort?

By introducing some new functions, for the first time in the industry, more diverse kneading techniques have been realized. Experience the brand new sensation of comfort.

### Effect and Efficacy

- \* Recovery from fatigue
- \* Promotion of blood circulation
- \* Removal of muscular fatigue
- \* Relief of muscular stiffness
- \* Alleviation of neuralgia or muscular pain

New function, first in the industry, kneads and slackens the stiffness accumulated around shoulders.

**First in the industry!** **New function**

## SHOULDER MASSAGER

By adding stimulations applied around the “SHOULDER”, which is one of massaging points over the entire shoulder area, to the traditional composite massaging with air bags and kneading rollers, the stiffness and fatigue accumulated over the neck and shoulders are alleviated.

### What is the purpose of “SHOULDER MASSAGER” ?

Fatigue is likely to accumulate in the areas from the base of the shoulders to the back, which are comparatively fixed, rather than the hands and shoulders, which are moved frequently. Fatigue and stiffness occur accordingly especially at the base of the shoulders. It is commonly known that it is effective for stiffness and fatigue, not only in the shoulders but also in the entire upper body, to wrap the point around the “SHOULDER” from both ends and massage widely over the areas from the bases of the shoulders to the back.

Try to enjoy the original function.

Realization of diverse kneading techniques closely reproducing those of a professional's hands

**Original function**

## 3D Mode Massage

Movements of entire arms have been introduced in addition to those of hands. Diverse and stereoscopic kneading techniques in which back and forth movements have been added to the basic functions such as the WAVELET, TAPPING, KNEAD UP, KNEAD DOWN, etc, reproduce the sensations exclusive to a professional's hands.

### Composite stretch

Composite function that realizes simultaneous KNEAD, TAPPING or WAVELET by utilizing the 3D mode function in addition to the stretching by the movements consisting of an initial upward push and following gentle downward push.

We are proud of our diverse and numerous kneading techniques!

Multiplier effects of air and mechanical massage slacken and remove stiffness from the surface to the center of body.

## 509 Types of Massage

50 Basic Mechanical Types, 9 Basic Air Types and 450 Combination Mechanical and Air Types = 509 Types

It provides an amazingly diverse 509 types of massage by combining the 3D mode in which back and forth movements of knead balls have been added to their basic capacities of AIR MASSAGE, KNEAD, TAPPING, STRETCH, SHIATSU, etc., and the ROLLING with which the spine is pressed in a stretching manner.

<p><b>DEEP KNEAD (KNEAD UP)</b></p> <p>For severe stiffness or tiredness over the whole body, the deep knead is applied from lower part to the top toward the shoulders.</p>	<p><b>DEEP KNEAD (KNEAD DOWN)</b></p> <p>For severe stiffness or tiredness over the whole body, deep knead is applied from top to the lower part toward the core of body.</p>	<p><b>RUBBING</b></p> <p>Massaging resembling gentle rubbing with the palms is applied slowly to slacken stiffness on the body.</p>	<p><b>SHIATSU</b></p> <p>Repeated pressing and releasing accelerates the blood circulation.</p>	<p><b>STRETCH</b></p> <p>Slackens the stiffness with the movements that resemble those of hands for pushing up and pulling down.</p>
<p><b>WAVELET</b></p> <p>Delicate movements of simultaneous TAPPING and KNEAD alleviate fatigue and accelerate blood circulation.</p>	<p><b>KNEAD UP</b></p> <p>Stiffened muscles are slackened deliberately from bottom to top.</p>	<p><b>KNEAD DOWN</b></p> <p>Knead from top to bottom alleviates the fatigue accumulated in the muscles.</p>	<p><b>TAPPING</b></p> <p>Rhythmical and repeated TAPPING by the knead balls remove the fatigue accumulated in the muscles.</p>	<p><b>SPINE STRETCH (WHOLE/PART)</b></p> <p>Stretches and rolls the spine.</p>

# Number of techniques that accelerate the blood circulation in the LOWER BODY. They alleviate fatigue and improve health

Presses, pinches and pulls the lower body where the blood flow is likely to become stagnant and fatigue is likely to accumulate.  
Supports your health from the feet with the method best fit to each section.

Blood flow is likely to become stagnant in the legs, as they are distant from the heart, causing swollen legs. A total of 14 pieces individual air bags apply the massage from the calves to the soles by wrapping and stretching them occasionally just as if by hands, in order to promote blood circulation.

Stiffness in the legs, where blood circulation is likely to become stagnant, is removed by stimulating the soles.

## New Function Air Massage on the Soles

The soles, where a number of massage points are concentrated, are stimulated while the legs are restrained not to lift. Stiffness accumulated in the feet during the day is kneaded and slackened to accelerate the blood circulation.

Stretching is also needed for knees!

## New Function NEW Foot stretching

Stretches the knees and the lower half of body by holding and bringing down the legs while pushing up the thighs with the air bag at the seat. Knee joints are massaged with gentle stretching to accelerate the blood circulation in the legs, which tend to swell.

Works effectively on stagnant blood in the legs!

## Calf Massage

Massaging of repeated pressurizing and releasing is applied at first to the bottom and then to the top of calves. This stimulation resembling milking helps enhance the important physical function to return the blood from the lower body to the heart.

Knead at the sections where it is likely to be overlooked that fatigue is hiding!

Soft stimulation by air over the area, which resembles the body being lifted, relieves stiffened muscles running from the bottom to the back of thighs and accelerates blood circulation at the ankles.

Pleasant vibrations for relieving fatigue!

## Original function Seat Face Vibrator

Vibrator function has been added at the seat. Continual and pleasant vibrations can be enjoyed simultaneously with the air massage, improving blood circulation and relieving fatigue.

## Seat Heater

Massaging effect is enhanced after warming up the body. The heater should be used for warming up not only in the autumn or winter but also in the season of air conditioners.

## New Type Remote Controller

Air Massage Selector button

SHOULDER MASSAGER (5-level strength adjustment)

Pulse Mode

Pulse Mode combines the gentle massaging with air with delicate stimulation just like by hands. Blood circulation is accelerated with rhythmic stimulation of 7 cycles comprising pressurizing, sustained pressurizing and release of pressure.

— Pressurizing — Depressurizing — Sustained pressurizing

Various kinds of information are displayed on the screen in easily comprehended ways. Controls are divided in two ways: Open the cover to start Manual Controls or close the cover to initiate the simplified AUTO COURSE controls.

Clear LCD Screen

AUTO COURSE Free selection from all 10 courses

STRENGTH button Selectable strength out of 5 levels depending on physical condition

Skip button Each push on the button changes to next movement.
