inada
chair H.9
FIC 2003

*World's first massage chair
to synchronise music
with massage*

Ivory

Remote Control Recline Adjustment

Use the remote control to adjust the angles of the back and foot rest to fit your body perfectly.

Footrest Length

The footrest can be moved forward or back to accommodate people of all heights.

The INADA Chair H.9 is the first massage chair to integrate music with massage through the Synchronised Music Program, enhancing the sensory experience of your massage for deeper mental relaxation.

Your massage will be keyed to the music, with seat vibration accompanying sounds in the bass range, tapping and back vibration for the treble range and leg vibration for the mid range. The program can sense variations in rhythm and melody as well as volume, so you can enjoy as much variation in your massage as you do in your CD collection.

Healthcare Programs:

- 1. Fullbody Relief:** Relaxes the muscles that affect your whole body and alleviates fatigue by stimulating acupressure points. Recommended for general fatigue and restlessness.
- 2. Stiff Shoulders:** Helps relieve tension and stiffness around the neck and shoulders, improving blood circulation by directly massaging and stimulating the muscles. Indirectly stimulates the acupressure points in this area.
- 3. Lower Back Tension:** Helps improve blood circulation and relieve pain, tension and stiffness of the lower back muscles due to intense exercise and prolonged standing by straightening the lower back with rollers, massaging the muscles and stimulating acupressure points.
- 4. Acupressure:** Helps recovery of tired and tense muscles. Slow deliberate roller movement stimulates acupressure points. Recommended for general fatigue and restlessness.
- 5. Seat:** Combined vibration and air massage directly stimulates the muscles of the seat area.

The compact, full-feature remote control makes operating the INADA Chair simple.

Remote Control (front cover)

Open panel cover for Manual Selection Mode. Customise settings in manual selection mode.

Display
Displays the program, the pressure point being massaged and the time remaining.

Power
Turns the power on and off. If the button is pressed during operation, the massage rollers will return to the start position before it is turned off.

Footrest
Adjusts angle of the footrest.

Shoulder Position Adjustment
If necessary, finely adjusts the start position after shiatsu point locating has been completed.

Healthcare Programs
Select one of the five healthcare programs.

Cancellation of Back vibration
Select one of the five healthcare programs.

Synchronised Music Program
Previous, Play/Stop, and Next.

Width Adjustment
Adjusts width of rollers.

Up/Down Adjustment
Adjusts the vertical position of the rollers.

Speed Adjustment
Adjusts the speed of Kneading, Tapping(1) and Kneading & Tapping operations.

Lower Body Strength Adjustment
Adjusts intensity of air massage.
