SUMMON UP NEW STRENGTH AS YOU REST

Are you longing to relax?

In stressful, everyday life, many people want the peace and quiet to sort themselves out and recover their strength. Night is a time of valuable regeneration. But modern life can also give you problems getting to sleep, which will affect your wellbeing. This is why Panasonic has turned a vision into reality. And that vision is being able to feel completely relaxed, at any time.

RELAXATION IS THE BASIS FOR INNER BALANCE

It is the source of regeneration for body, mind and spirit.
It enables us to summon up new strength and energy.

Relaxation helps us to find our way back to the harmony of mind and body, to respond to what life has to offer, and to set ourselves new challenges. You do not need to dream about this relaxation any more. Yasumi has made it a reality.

YASUMI – ENJOY FANTASTIC RELAXATION

The gentle rocking movements and soothing background music of the yasumi Relax Chair activate your natural relaxation process.

“yasumi” comes from the Japanese and means “respite”. The concept represents rest, vacation and inner equilibrium. Indulge in a short break from everyday life with the Relax Chair, and experience a new lightness of being.

SYMPHONY FOR THE SENSES

Gentle rocking movements combined with restful music – these natural relaxation aids are not just for babies and infants.

These mechanisms also make adults feel confident and safe. The Relax Chair makes use of these natural principles, so that you can simply switch off and completely relax.

Sensitize your body with bass vibrations

The yasumi Relax Chair has a bass system that you can modulate, to boost the pleasant effect of the music. Subwoofers in the backrest intensify the sense of relaxation with bass vibrations that fill your body.

Enjoy your personal choice of music

You can play your own music, audio books or the TV program, via an external audio input.

SET YOUR SPIRIT FREE AND EXPERIENCE THE LIGHTNESS OF BEING

The yasumi Relax Chair combines an attractive design, invigorating relaxation programs and excellent reclining comfort in an elegant and stylish piece of furniture. Whether design, upholstery or added feature, all the components of the Relax Chair have one aim: your wellbeing.

Ergonomic form

The shaping of relaxation furniture is crucial to its reclining comfort. The ergonomic design of the Relax Chair matches the human physique and invites you to relax in comfort, actively relieving the stress on your bones and joints.

Comfortable upholstery for ultimate relaxation

The comfortable upholstery of the Relax Chair makes a pleasant and restful bed for your body, the ideal condition for complete relaxation.

Simple operation for maximum comfort

The cordless remote control is easy to operate, not only helping you feel blissfully relaxed, but also emphasizing the brilliant features.

Flexible sitting position adjustment

It does not matter whether you want to sit down, or relax with your legs up, the sitting and reclining positions of the Relax Chair are infinitely variable. You decide the position in which to enjoy your book, or your feature film.

INDULGE IN A WELLNESS PROGRAM EVERY DAY

Lean back for relaxing yet invigorating rest phases.

With Panasonic's yasumi Relax Chair, the perfect interplay of pleasant rocking programs, excellent reclining comfort and soothing music has become reality, with a promise of undreamt relaxation.

A style classic with a full pampering program

The harmonized oscillation and music programs were developed to activate your body's relaxation. It does not matter whether it is a short regeneration phase, an extensive relaxation program, or a convenient sleeping aid, with Panasonic's yasumi Relax Chair you summon up new strength in a matter of minutes, and discover a complete, all-round sense of wellbeing.

Relax Program

Your falling-asleep phase is actively started just a few minutes into the 20-minute Relax Program. The oscillation movements slow down and the tempo of the music is gradually reduced, so that you quickly fall asleep.

Refresh Program

Indulge in a "power nap", to get you going again, ready to face the second half of the day. To quickly and gently lull you to sleep, the 20-minute Refresh Program first reduces the oscillation interval and slows down the music. About 15 minutes later, the rocking motion and music intensity increase again, to gently wake you.

Comfort Program

The Comfort Program lasts for two hours and invites you to read, watch TV, or listen to music while you relax. In the upright position, you enjoy the yasumi Relax Chair's rhythmic oscillations, reminiscent of the gentle movement of the waves.

“ The Relax Chair is ideal for power napping in between times. If I just want to switch off for a while, I lay down in the chair, start the Refresh Program and 20 minutes later, I feel like a new person. ”
